**M**Y STUDY AT home, my 'room with a view'. In the deep mnemonic silence of the night, this is where I spend much time....my real late nights.

This space is imbued with intrinsic calm, conducive to creative combustion...for whatever it's worth. My favourite activities are indulged here: reading, listening to classical music and viewing great films.

Over weekends, I am often joined here by my husband Rome, our various children and Anadya and Zohravar, our

grandchildren. Right now, the flavour of the month is Shakespeare. Zohravar has recently started tabla lessons in this room. His tabla "bols" add another resonance to this space's rhythms.

This study is fairly simple—old kilims, my furniture, contemporary lights by Suryaveer, technologies by Kohelika.

In this space I work, relax and dream. Often, I just look out at the beautiful kusum tree in our courtyard. This is a nurturing space, where "I am". ●
